

# Your Turn: Feedback?

Michael Friendly  
Psych 6135

<https://friendly.github.io/6135/>

# Overall impression of 6135?

- What **topics** were the most/least interesting?
- What course **aspects** did you learn most/least from?
  - Lectures / readings / prep for presentations / ...
- How did you use the course **materials** on the web?
  - Lecture notes?
  - Readings?
  - Resources?
- How does this relate to your own work?

# What could have been done differently?

- Topics:
  - More of X?
  - Less of Y?
- Hands on stuff?
  - More time showing coding in R/Rstudio?
  - More exercises/examples/mini-assignments?
- More 'active learning' components?
  - Class demos, participation activities?
  - Graph critiques? Could this be a class activity?
- Evaluation:
  - Something other than mini-pres / presentation / paper?
  - Re-weight components?

# Future of data visualization?

- What do you think are important or hot topics for the future?
  - Areas of application?
  - New methods?
- What would be good topics for next 6135?
- What excites you?
