

Data Visualization For Good

Arleen & Iris

June 14, 2021

Data for Good

- A movement gaining momentum to use data to mobilize a change in society
- DataKind → connecting high-impact organizations with data scientists to use data science in the service of humanity.

*“...use data to not only make better decisions about what kind of movie we want to see, but what kind of **world** we want to see..”*

DataKind®

A large crowd of diverse people, each represented by a small 3D model, is gathered together to form the shape of the United States map. The people are dressed in various colors and styles of clothing, creating a vibrant and diverse visual representation of a movement.

Seeing the evidence is key

- Data visualization is a key element of the movement

"The data for good movement is about harnessing the power of data visualizations, data analytics and [augmented intelligence] for social change by using data to create new insights and outcomes for a better world."

-Neviana Zhgaba, Oracle Developer Tools User Group

viz for social good

1. Project Launch

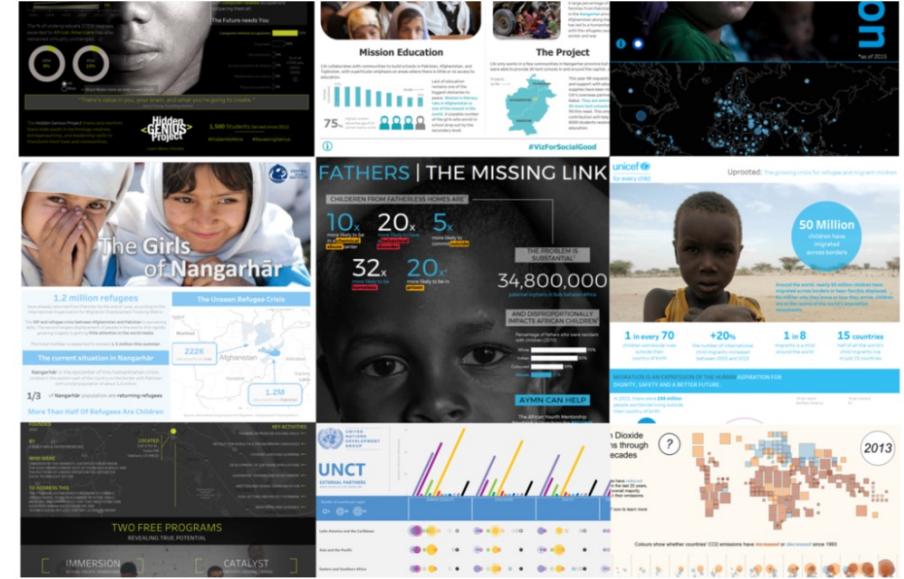

A non-profit submits a request and the organization begins to gather materials (goals, data) and notifies volunteers.

2. Data Visualizing

Volunteers get to work visualizing the data!

3. Impact

The non-profit reviews all the submissions and selects visualizations for their campaign 😊

Organization: Crowd2Map

Two billion people in rural communities throughout the world are not on proper maps, including 17 million in Tanzania. This has many negative impacts for navigation, planning, and for activists protecting the up to 3 million girls at risk of Female Genital Mutilation, FGM.

In the last 5 years Crowd2Map, an entire volunteer project has recruited and trained over 16,000 online remote mappers who have added over 5 million buildings into OpenStreetMap. Better maps have helped save over 3000 girls from FGM.

Project Information

Crowd2Map recognizes that everyone should be counted. Without accessible, good quality maps of rural Tanzania's progress towards the Sustainable Development Goals cannot be planned and measured at a village level. Therefore we are training local communities to add their local knowledge to base maps created from satellite images to open maps that everyone can access, use and develop.

Visualizing how far we have come and how much is still to do is a priority to motivate our many volunteers and to track progress to aid planning.

FGC SAFEHOUSE

Call-to-Action

Help communicate the impact that Crowd2Map has had to date by creating engaging data visualizations to visually communicate the achievements on the Crowd2Map website.

Audience

Potential partners, our volunteer mappers, the wider mapping community, the general public, and through feedback sessions hosted by local monitoring staff, communities

Use of Data Visualization

Website, social media, reports, other communications

Joycelyn Illoreta @joy_illoreta · May 20	
Supporting the initiative that saves girls from FGM. Check out my entry. @Crowd2Map, @VizFSGin, #vizforsocialgood public.tableau.com/profile/joycel...	
Crowd2Map has significantly improved the maps of rural Tanzania. This project added schools, clinics, hospitals, buildings, roads and villages into the maps. Having efficient and detailed maps help rescuers quickly save girls who are at risk of female genital mutilation (FGM).	
 3,000 Number of GIRLS SAVED FROM FGM	 1,338,926 Length (km) of ROAD ADDED BY MAPPERS
 1,021 Number of SCHOOLS ADDED BY MAPPERS	 1,224 Number of CLINICS ADDED BY MAPPERS
 96 Number of HOSPITALS ADDED BY MAPPERS	 120,35 Total Area (sq km) COVERED BY THE PROJECT

David Roethlisberger @DavRoeth · Apr 30
 My submission for the #VizForSocialGood project with # Crowd2Map Tanzania.
 Thanks @VizFSG @ Crowd2Map for organizing the project.

Link to my viz: public.tableau.com/views/VizforSa/.

The visualization features a world map with dots representing remote mappers, primarily concentrated in East Africa and South America. A legend at the bottom indicates the number of remote mappers per country. To the right, a bar chart lists the top 10 mappers by the number of OSM data added, with GoodHarvest at the top. The main title is 'IMPACT OF THE CROWD2MAP INITIATIVE IN TANZANIA' with a subtitle 'Visit <https://crowd2map.org/> for more info.' Below the title, summary statistics are displayed:

	3,000	16.4K	10,243	7.3M	120K	1,224	96	1,021	9,290

 **Delphine Rouvillois** @drouvi · Apr 30

With **#VizForSocialGood**, we leverage our data skills to do social good! In this month's project, we help the non-profit **#crowd2map** communicate the impact it has in Tanzania, preventing FGM through mapping.

Thanks **@VizFSG** **@Crowd2Map!**

Link to my submission: public.tableau.com/views/VizForSo...

The visualization includes the following data:

- VOLUNTEERS:** 16K
- FGM PREVENTED:** 3K
- CLINICS ADDED:** 1,224 (out of 2,964 clinics in Tanzania (42%))
- HOSPITALS ADDED:** 96 (out of 861 hospitals in Tanzania (11%))
- VILLAGES ADDED:** 9,290 (out of 13,836 villages in Tanzania (67%))
- SCHOOLS ADDED:** 1,021 (out of 10,595 schools in Tanzania (10%))

LOCATION OF OUR VOLUNTEER MAPPERS: Hover over a dot to display mappers' details (URL to photo when available).

THANK YOU TO ALL THE MAPPERS!

CROWD2MAP

TANZANIA

Putting rural Tanzania on the map

Viz for Social Good

30% - 60% of girls and women aged 15-49 still go through FGM in Tanzania's rural communities

What is FGM?

Female Genital Mutilation (FGM) also referred to as Female Genital Cutting (FGC), was criminalised in 1996 on girls under the age of 16 in Tanzania. The legal procedure is often performed without pain relief or hygiene equipment and can lead to complete infections, infertility and in some cases, girls have died to death.

OMS Members since

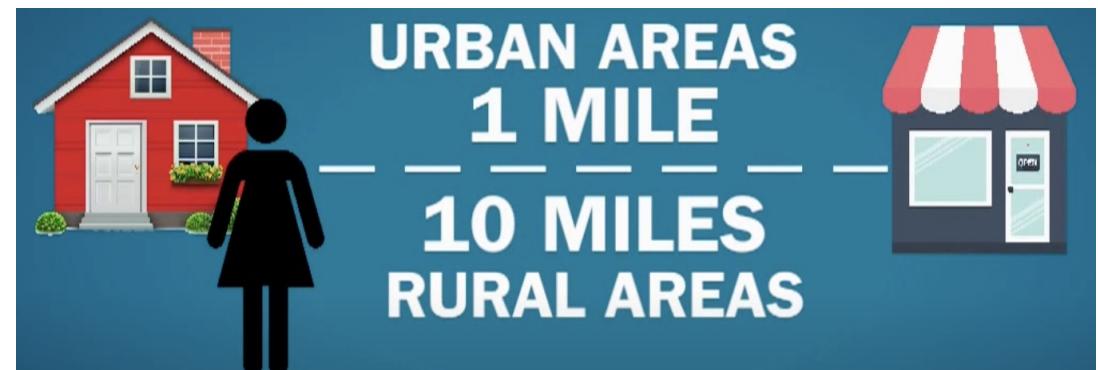

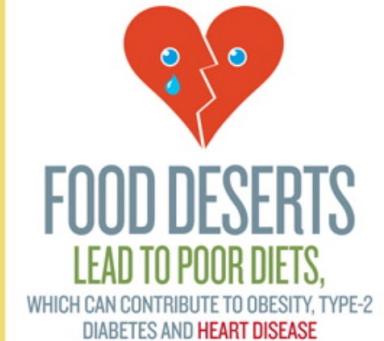

What is a food desert?

- An area in the United States with limited access to affordable and nutritious food, particularly such an area composed of predominantly lower-income neighborhoods and communities

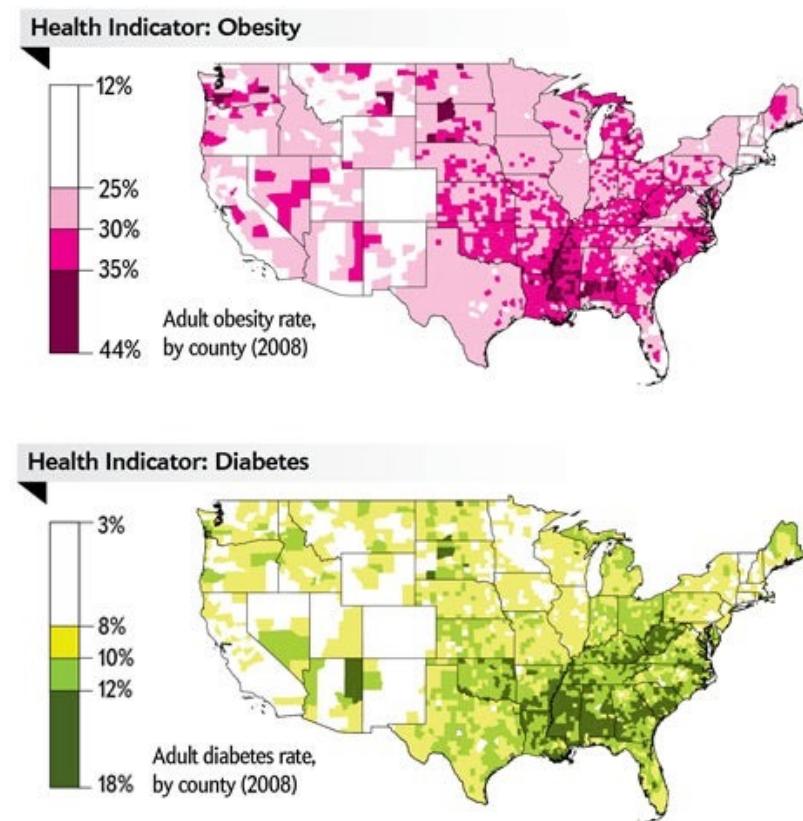

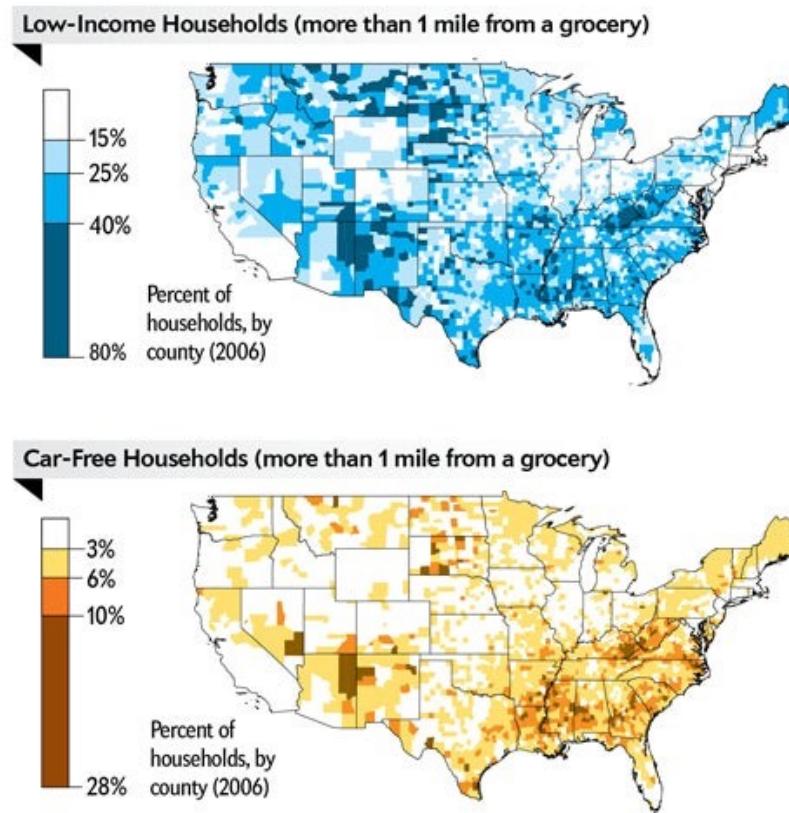

Scope

- Approximately 23.5 million people live in food deserts. Nearly half of them are also low-income.
- Of all households in the United States, 2.3 million, or 2.2%, live more than a mile from a supermarket and do not have access to a vehicle

Impact on health

- Non-availability of fresh food may worsen obesity, diabetes, and other diet-related health conditions
- Association between presence of supermarkets to lower obesity rates, and convenience stores to higher rates

Let's hear from you!

Thoughts

Feelings

Importance

Knowledge

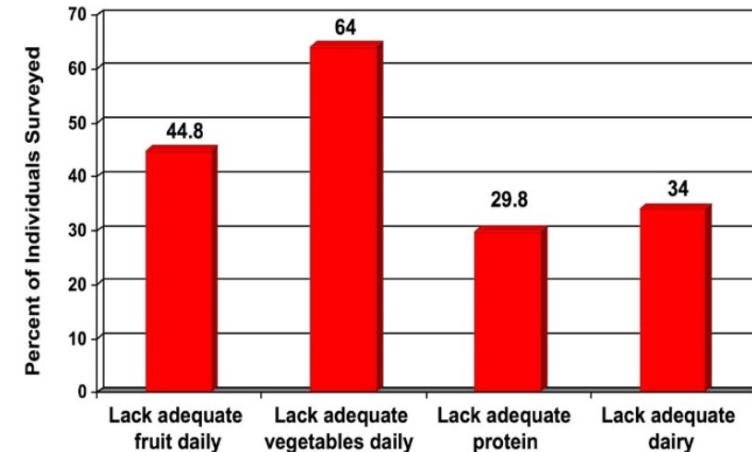

Example: Rural Iowa

Text

- Almost half did not consume adequate amounts of fresh fruits
- Nearly two-thirds did not consume adequate amounts of vegetables
- More than one-third lacked adequate dairy in their diet
- More than one-fourth lacked the recommended levels of protein in their diet

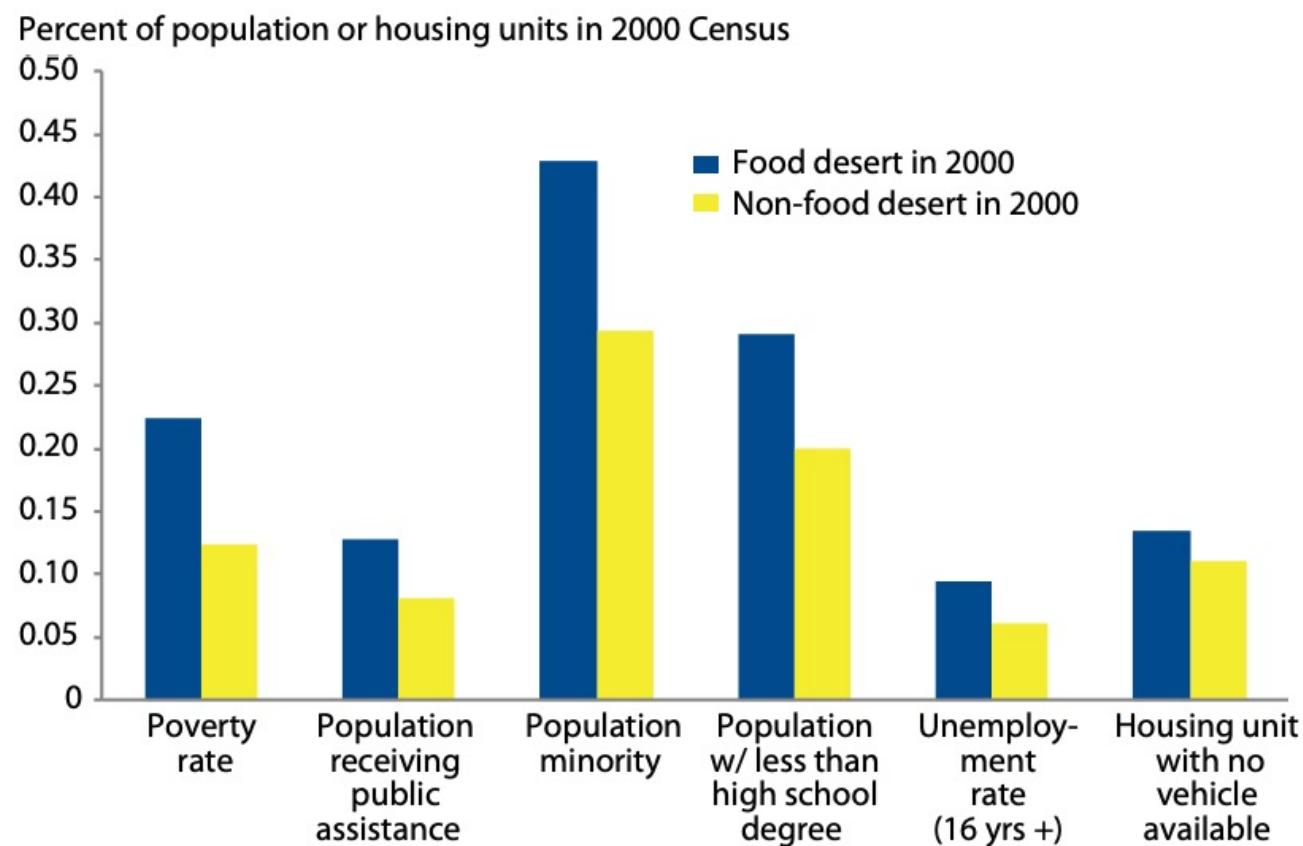

Vs. Graphic

Figure 1: Average Proportion of Residents Across Four Food Deserts in Iowa who...

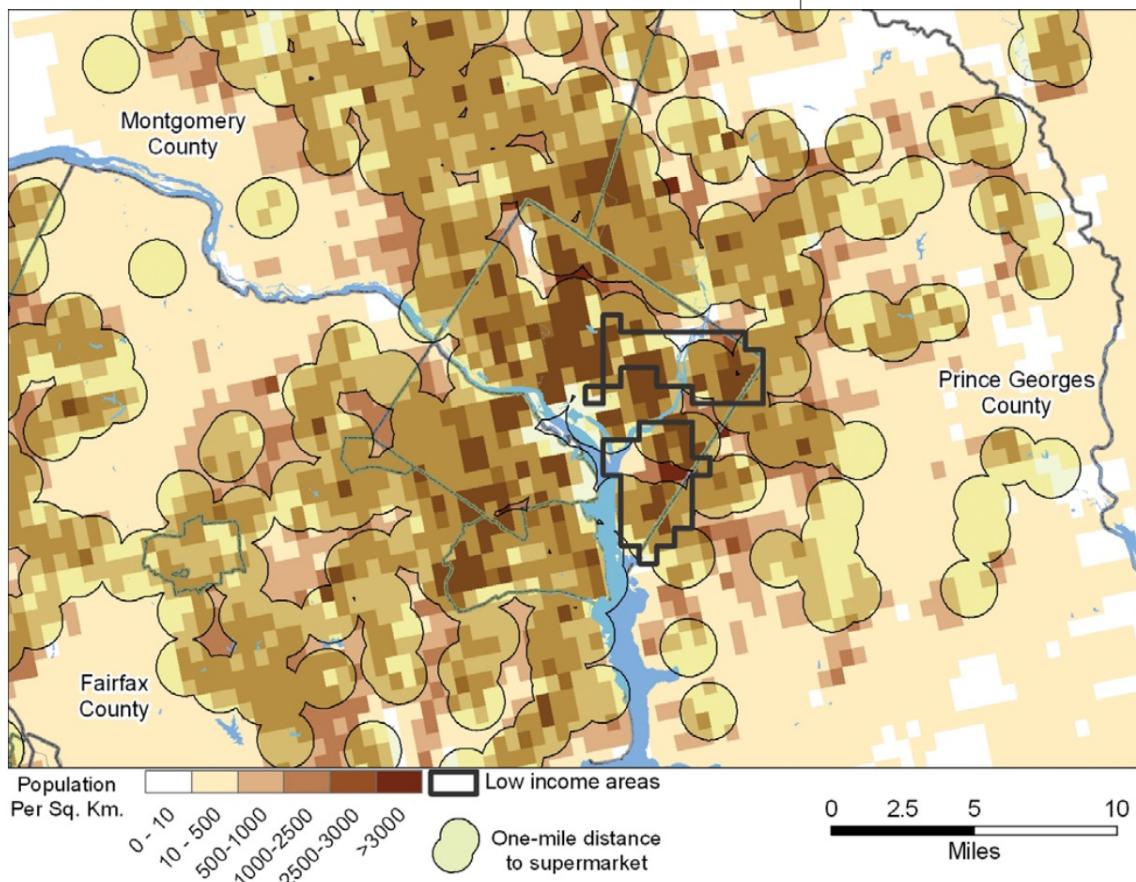

Across USA: demographics

Figure 1
Mean characteristics of food deserts versus other tracts, Census 2000

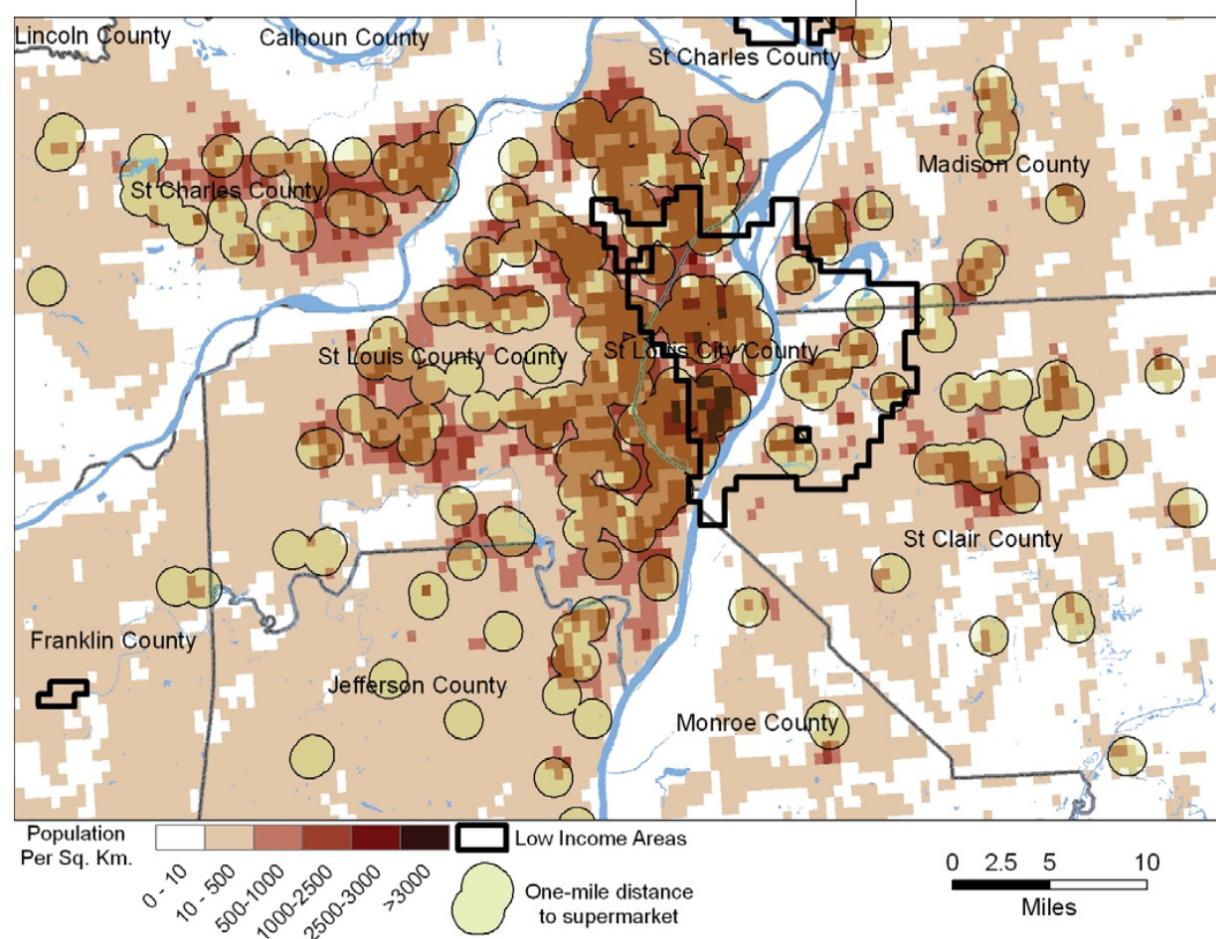

USA: Urban areas

Map 2.2
Washington, DC Urban Area

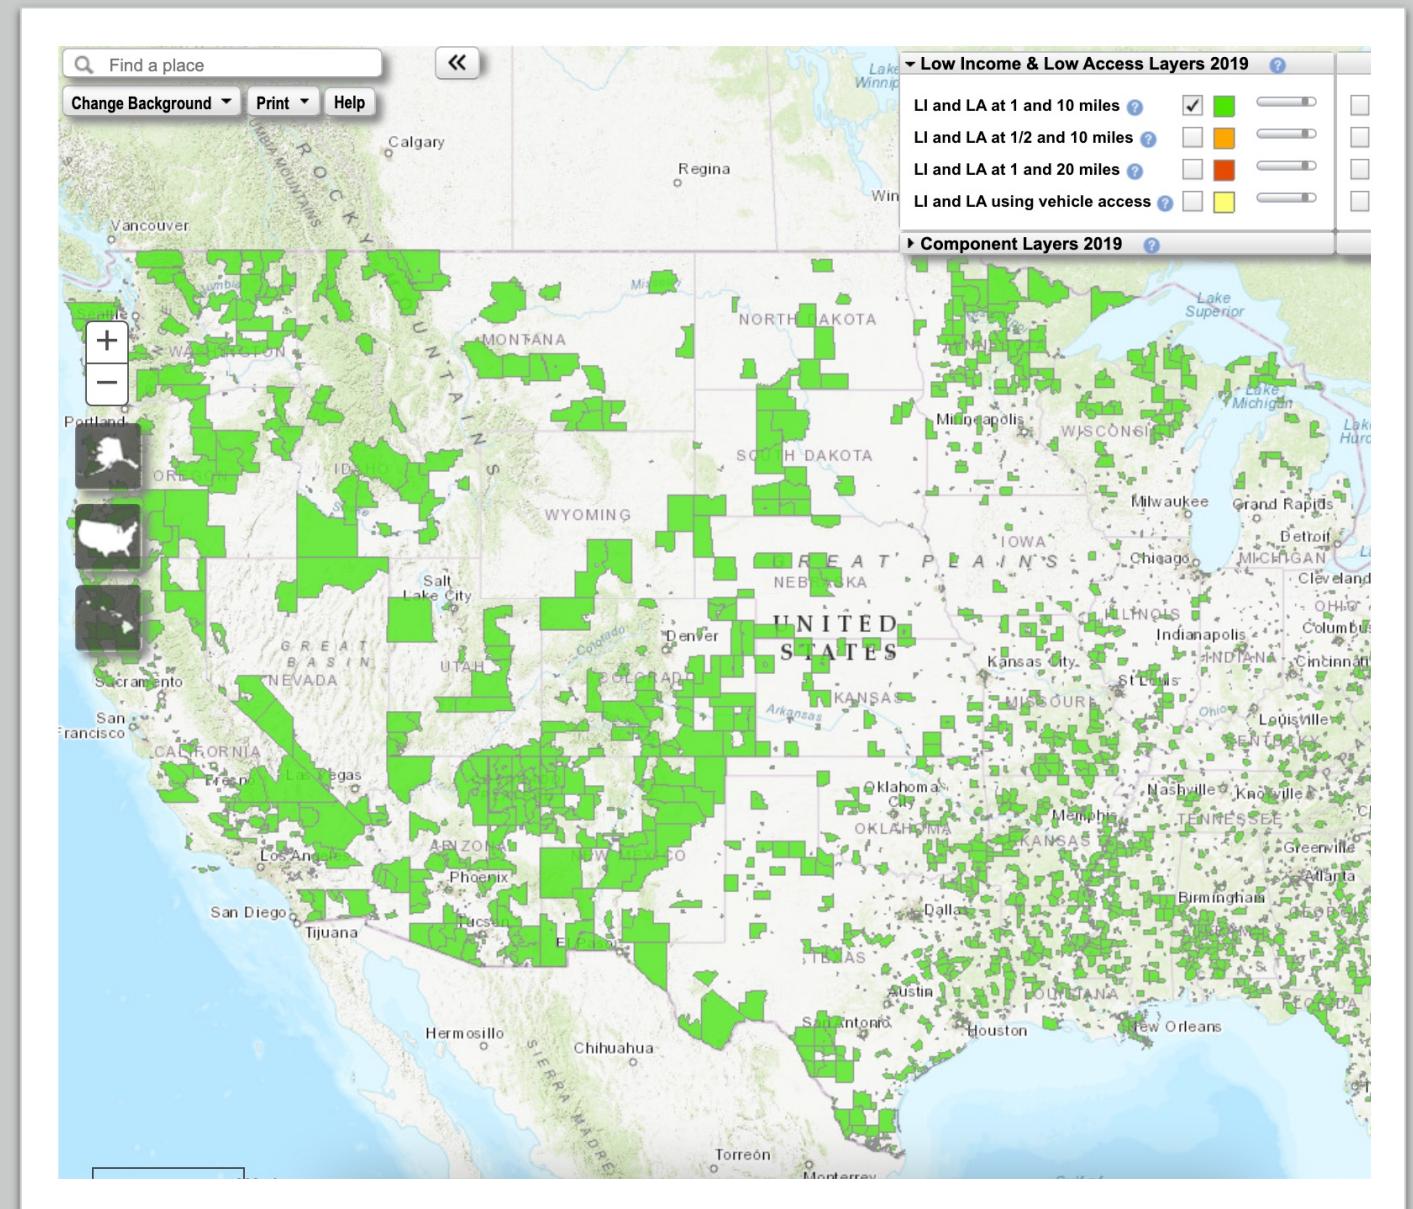

Map 2.3
St. Louis, Missouri Urban Area

Interactive map

- <https://www.ers.usda.gov/data-products/food-access-research-atlas/go-to-the-atlas/>

Solutions

- Support independent local gardening bed initiatives
- Encourage residents to maintain and sustain community gardens
- Encourage education of residents in preparing healthy foods
- Develop meals-on-wheels programs to transport healthy foods to those with reduced mobility
- Encourage smaller more local convenience stores to carry some healthier food options

Let's hear from you!

Thoughts

Feelings

Importance

Knowledge

Thank you!
